1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sizemore. Applicant's arguments have been considered but are not deemed persuasive. Applicant argues that the reference is limited to disclosing a medical tape. However, this is not the case since at column 1, lines 7-10 the reference describes its invention as relating to adhesive tape and the like. Applicant also states that perforated tape would not serve well as masking tape because it would allow paint to pass through the tape. However the instant claims are directed to perforated tape and, as a result, the instantly claimed tape would not function any more efficiently than that of the reference. Concerning the discussion of the spacing of the separation lines, since a wall outlet may be any size the instant claims do not structurally distinguish over the reference's article.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1772

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's acknowledged state of the art in view of Sizemore. Applicant's arguments have been considered but are not deemed persuasive for the reasons of record.

5. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's acknowledged state of the art in view of Sizemore as applied to claims 1 and 2 above, and further in view of either Cohausz or Perri. Applicant's arguments have been considered but are not deemed persuasive. Applicant argues that neither Cohausz or Perri teach the use of elongated cuts on the edge of a section of tape. However the notches, 43 in Perri and 8 in Cohausz, may be considered "elongated" cuts at the edges of an adhesive tape since the term "elongated" is defines no specific length of cut. Furthermore, the notches in the references' articles appear to be directed inwardly a length that is longer than the associated perforations in the remaining part of the lines of weakness.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1772

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
